

LIMITED WARRANTY FOR AIRCRAFT AND AIRCRAFT COMPONENTS

We hope you enjoy your aircraft. We have worked hard to ensure that our products meet the demands we expect to appear in normal operations with proper maintenance. However, it is impossible to predict every field problem with design or manufacturing. As such, in addition to a continued airworthiness system we offer a one year or 150 hour, whichever comes first, limited warranty on any defect in materials and workmanship. The start date of the warranty is the airworthiness date of the aircraft or component. In the event a unit does not conform to this express warranty, SilverLight Aviation will repair or replace the defective material at its place of business at Zephyrhills, FL USA or via an approved service station or mechanic. SilverLight Aviation will decide which remedy, repair, or replacement will be provided. Any replacement of a part of a unit during the warranty period will not extend the warranty beyond the original duration. The remedy of repair or replacement is exclusive and does not include the cost of shipping, removal, getting the aircraft to an approved place of service, all of which are the customer's responsibility. Procedure for obtaining Warranty Service or parts that are defective is as follows:

- 1) Document the issue with as much data and aircraft details as possible including images and convey that to SilverLight Aviation to make a determination
- 2) Follow SilverLight Aviation's guidance on shipping the defective parts back.
- 3) When the old parts are received back, determination is made to qualification for warranty and customer is informed of the results. If warranty service is deemed reasonable, new replacement parts are sent out to the customer. If a field mechanic is needed to install the parts, SilverLight Aviation will issue labor hours deemed reasonable based on experience for the job at hand at pre-determined shop rate. These labor hours will be paid directly to the service facility or mechanic. Owners are not paid for labor under any circumstances if they decide to do the work themselves

NOTE: In some instances if quicker service is needed, customer can pay and order new parts while the old parts are being shipped. Once old parts are received, determination will be made if the problem qualifies for warranty and based on the results, the customer may be issued a refund for the new parts

Warranty on third party items like avionics, lights, propellers and engines are provided by the manufacturers for those items. SilverLight Aviation will assist in getting that warranty but is not responsible for that warranty. It is important for customers to register for these warranties following printed or digital documentation from these suppliers. Some of this documentation is expected to be downloaded from the supplier's website in digital format by the end user.

This limited warranty applies only to units that have been installed, used, and maintained properly in strict accordance with manufacturer's specifications, instructions, and recommendations. It does not cover units or parts that show abuse, alterations, improper installation, improper or illegal maintenance or repair, or improper packaging for shipment; and it does not pertain to damage due to an object strike, hard landings or excessive wear due to operation or improper storage in the elements. Use of the aircraft of any kind by the pilot that does not follow the flight envelope or operating limitations automatically voids this warranty.

This limited warranty is the only warranty provided with respect to covered units
